MEDICAL EXAMINER'S VERDICT

Thomas P. Gilson, M.D.
Medical Examiner

**THE STATE OF OHIO,
SS.
CUYAHOGA COUNTY**

CASE NUMBER: IN2012-02023

Be it Remembered, That on the 29th day of November, 2012 information was given to me, **Thomas P. Gilson, M.D.**, Medical Examiner of said County, that the dead body of a man supposed to have come to his death as the result of criminal or other violent means, or by casualty, or by suicide, or suddenly when in apparent health, or in any suspicious or unusual manner, (Sec. 313-11, 313-12 R.C. Ohio) had been found in auto, in roadway, vicinity of 14001 Terrace Road in East Cleveland of Cuyahoga County, on the 29th day of November, 2012.

I viewed or caused to be viewed the said body at the Medical Examiner's Office. After the viewing and making inquiry into the circumstances that caused the death of the said person, I obtained further information, to-wit: (ECPD #12-07399) (CCMEO #IN2012-02024). I also carefully examined or caused to be examined the said dead body at 7:15AM on the 1st day of December, 2012 and I find as follows: to wit:

I, **Thomas P. Gilson, M.D.**, Medical Examiner of said county, having diligently inquired, do true presentment make in what manner Timothy Ray Russell, whose body was at the Medical Examiner's Office on the 1st day of December, 2012 came to his death. The said Timothy Ray Russell was divorced, 43 years of age, a resident of Maple Heights, Cuyahoga County, Ohio, and a native of Baton Rouge, Louisiana; was of the Black race, and had brown eyes, black hair, black/gray beard, black mustache, was 64 inches in height, and weighed 217.5 pounds.

Upon full inquiry based on all the known facts, I find that the said Timothy Ray Russell came to his death officially on the 29th day of November, 2012 in auto, in roadway, vicinity of 14001 Terrace Road and was officially pronounced dead at 11:10 P.M., by Dr. Haynesworth. There is history that on November 29th, 2012 at about 10:50 P.M., the East Cleveland Police and Paramedics responded to calls of shots fired by Cleveland Police Officers at the aforementioned location. On arrival, a male, later identified as the said Timothy Ray Russell, 19115 Fairway Avenue, was found expired in the driver's seat of the vehicle with serious visible injuries, and was pronounced dead at the aforementioned time and date. The County Medical Examiner's Office was notified and Esposito Mortuary Services was dispatched. This man was then transported to the Medical Examiner's Office where an autopsy was performed. There is further history that Melissa Ann Williams, a passenger in the auto, was also found to have expired with serious visible injuries and was pronounced dead at the aforementioned time and date. That death in this case was the end result of multiple (23) gunshot wounds of head and neck, torso, and extremities, and was homicidal in nature.

Cause of Death: Multiple (23) gunshot wounds of head and neck, torso, and extremities with skeletal, vascular, and visceral injuries.
HOMICIDE.

Analytes included in Drug Groups / Class

- 1) **VOLATILES:** Acetaldehyde, Acetone, Acetonitrile*, Butane, Chloroform*, Dichloromethane*, Ethanol, Ethyl Acetate*, Formaldehyde, Isopropanol, Methane, Methanol, Paraldehyde*, Propane, Toluene*.
ETHANOL, ACETONE, ISOPROPANOL, and METHANOL confirmation by alternative GC column and/or alternative specimens.
METHANOL is differentiated from **FORMALDEHYDE** by Colorimetry (Qualitative).
- 2) **Sedatives, Hypnotics, Anti-Epileptic and Other Acidic/Neutral Drugs**
Amobarbital, Butalbital, Caffeine, Carbamazepine, Carisoprodol, Glutethimide, Ibuprofen, Levetiracetam, Mephenytoin, Meprobamate, Metaxalone, Naproxen, Pentobarbital, Pentoxifylline, Phenobarbital, Phenytoin, Primidone, Secobarbital, Theophylline, Topiramate; **ACID NEUTRAL** Confirmation by GC/MS.
- 3) **Carbon Monoxide*(Carboxyhemoglobin)** by Co-Oximetry: Carbon Monoxide, Methemoglobin, Hemoglobin; **CARBON MONOXIDE** confirmation by Spectrophotometry and/or Microdiffusion.
- 4) **Glycols*:** Ethylene Glycol, Propylene Glycol screened and quantified by GC and confirmed by GC/MS.
- 5) **Cyanide*:** Screened and quantified by GC and confirmed by GC/MS.
- 6) **EMIT®: SYMPATHOMIMETIC AMINES** (target = d-Amphetamine); **BENZODIAZEPINES** (Target= Oxazepam); **COCAINE** (Target= Benzoylcegonine (a cocaine metabolite)); **CANNABINOIDS** (Target= 11-nor-Δ-9-THC-COOH (a marijuana metabolite)); **OPIATES** (Target= Morphine); **PHENCYCLIDINE** (Target= Phencyclidine).
- 7) **ELISA (Enzyme-Linked Immunosorbent Assay) Screen:** SMAs (Target = d-Amphetamine); Barbiturates (Target = Pentobarbital); Benzodiazepines (Target = Alprazolam); Cannabinoids (Target = 11-nor-Δ-9-THC-COOH (a marijuana metabolite)); Carisoprodol (Target = Carisoprodol); Cocaine Metabolite (Target = Benzoylcegonine); Fentanyl (Target = Fentanyl); Methamphetamine (Target = d-Methamphetamine); Oxycodone (Target = Oxycodone); Phencyclidine (Target = Phencyclidine); Tricyclic Antidepressants (Target = Nortriptyline); Methadone (Target = Methadone); Opiates (Target = Morphine).
- 8) **BASIC DRUGS by GC/MS (Quantitation and Confirmation)** Amantadine, Amitriptyline, Amoxapine, Amphetamine, Atropine, Benzotropine, Brompheniramine, Bupivacaine, Bupropion, Bupropion Metabolites, Buspirone, Caffeine, Carbinoxamine, Chlorophenylpiperazine, Chlorpheniramine, Chlorpromazine, Citalopram, Clomipramine, Clozapine, Cocaine, Codeine, Cocaine and metabolites, Cotinine, Cyclizine, Cyclobenzaprine, Desalkylflurazepam, Desipramine, Desmethyl Chlordiazepoxide, Desmethyl Clomipramine, Desmethyl Clozapine, Desmethylsertraline, Desmethylvenlafaxine, Dextromethorphan, Diazepam, Diethylpropion, Diphenhydramine, Disopyramide, Diltiazem, Doxepin, Doxylamine, Ecgonine methyl ester, Ephedrine/Pseudoephedrine, Fenfuramine, Fentanyl, Fluoxetine, Fluvoxamine, Guaifenesin, Haloperidol, Hydrocodone, Hydroxyzine, Imipramine, Ketamine, Laudanosine, Lidocaine, Lidocaine mb (MEGX), Loxapine, Maprotiline, Medizine, Meperidine, Mephentermine, Mesoridazine, Methadone, Methadone primary mb (EDDP), Methadone secondary mb (EMDP), Methamphetamine, Methylene-dioxyamphetamine (MDA), Methylene-dioxy-methamphetamine (MDMA), Methyphenidate, Metoprolol, Mexiletine, Midazolam, Mirtazapine, Nefazodone, Nicotine, Nordiazepam, Nordoxepin, Norfluoxetine, Normeperidine, Norpropoxyphene, Nortriptyline, Norverapamil, Olanzapine, Orphenadrine, Oxycodone, Papaverine, Paroxetine, Pentazocine, Pentoxifylline, Perphenazine, Phencyclidine, beta-Phenethylamine, Pheniramine, Phendimetrazine, Phenmetrazine, Phentermine, Phenylpropanolamine, Phenytolexamine, Procaine, Promethazine, Propoxyphene, Propranolol, Protriptyline, Pseudoephedrine, Pyrilamine, Quetiapine, Quinidine, Quinine, Sertraline, Thionidazine, Tramadol, Tranylcypromine, Trazodone, Trihexyphenidyl, Trimipramine, Tripeleminamine, Venlafaxine, Verapamil, Zolpidem.
- 9) **ACETAMINOPHEN SCREEN:** Acetaminophen by Colorimetry (Qualitative).
- 10) **SALICYLATE SCREEN:** Salicylate (Aspirin) by Colorimetry (Qualitative). **SALICYLATE CONFIRMATION** by Gas Chromatography.
- 11) **XANTHINES** by HPLC: Acetaminophen, Caffeine, Theophylline.
- 12) **Clinical Chemistries:** Ketones, pH, Specific Gravity, and Electrolytes (Sodium, Potassium, Chloride, TCO₂, Glucose, Urea, Creatinine).
- 13) **CANNABINOIDS GC/MS:** Cannabinoids (ng/mL; mcg/L): D⁹-THC, 11-OH-D⁹-THC (a marijuana metabolite), 11-nor- D⁹-THC-COOH (a marijuana metabolite), TOTAL 11-nor- D⁹-THC-COOH (a marijuana metabolite).
- 14) **OPIATES by GC/MS (ng/mL):** Morphine, 6-Acetylmorphine (heroin metabolite), Codeine, Hydrocodone, Dihydrocodeine, Hydromorphone, Norcodeine*, Oxycodone; **TOTAL OPIATES** by GC/MS-Hydrolysis followed by **OPIATES** by GC/MS.
- 15) **BENZODIAZEPINE Confirmation by GC/MS:** Alprazolam/ metabolite, Diazepam/ metabolites, Clonazepam, Lorazepam, Midazolam/metabolite, Triazolam.
- 16) **SYMPATHOMIMETIC AMINES CONFIRMATION** by GC/MS analysis (ng/mL). Amantadine, Amphetamine, beta-Phenethylamine, Mephentermine, Methamphetamine, Methylene-dioxyamphetamine (MDA), Methylene-dioxy-methamphetamine (MDMA), Phentermine, Phenylpropanolamine, Pseudoephedrine.
- 17) **GHB by GC/MS (mg/L):** Gamma-hydroxybutyric acid (gamma hydroxybutyrate).
- 18) **Fentanyl by GC/MS (ng/mL):** Fentanyl, sufentanil, alfentanil.
- 19) **SENT OUT TO REFERENCE LABS:** Epinephrine, 7-amino Flunitrazepam, Flunitrazepam, IgE, Insulin, LSD, Nefedipine, C-Peptide, Psilocin, Risperidone, Tryptase, Warfarin, Valproic Acid, **HEAVY METAL SCREEN:** (Antimony, Arsenic, Lead, Barium, Cadmium, Bismuth, Mercury, Selenium) or any other drugs not listed above.

*BY REQUEST ONLY; **ABBREVIATIONS:** POS=Positive; NEG=Negative; UNS=Specimen unsuitable for testing; QNS=Quantity insufficient for analysis; NTDN=Not Done; CHEM7=Clinical chemistry; <=less than; >=greater than; LRL=lower reporting limit. **UNITS FOR VOLATILES:** 100 mg/dL = 0.100 g/dL = 0.100 g%. **UNITS:** 1 mg/L = 1000 µg/L = 1000 ng/mL.

I certify that the specimen identified by this case, number IN2012-02023 have been handled and analyzed in accordance with all applicable requirements. The result in this report relate to the items tested. For purposes of identification and case tracking the Toxicology Lab uses case numbers exclusively. Name is subject to change based on receipt of information. This report shall not be reproduced except in full, without the written approval of the Cuyahoga County Regional Forensic Science Laboratory.

REPORT OF AUTOPSY

Thomas P. Gilson, M.D.
 Medical Examiner

THE STATE OF OHIO,
SS.
CUYAHOGA COUNTY

CASE NUMBER: IN2012-02023

REPORT OF AUTOPSY OF: Timothy Ray Russell
ADDRESS: 19115 Fairway Avenue, Maple Heights, Ohio

I, **Thomas P. Gilson, M.D.**, Medical Examiner of Cuyahoga County, Ohio, Certify that on the **1st** day of **December, 2012** at **10:15 AM** in accordance with Section 313.13 of the Revised Code, of the State of Ohio, an autopsy was performed on the body of **Timothy Ray Russell**.

The following is the report of autopsy to the best of my knowledge and belief: This person was a **male**, **divorced**, aged **43 years**, of the **Black** race; had **brown** eyes, **black** hair, **poor** teeth, was **64 inches** in height, weighing **217.5 pounds**; a native of **Baton Rouge, Louisiana**.

ANATOMIC DIAGNOSES:

- I. Penetrating gunshot wounds (8) of head, neck, and chest with identifiable wound tracts
 - A. Penetrating gunshot wounds (2) of head
 1. Lacerations of scalp, subcutaneous soft tissues, and skeletal muscles
 2. Skull fractures, right and left parietal bones, left temporal and sphenoid bones, right and left frontal bones, left maxilla
 3. Subarachnoid hemorrhage, diffuse
 4. Brain lacerations and contusions, right and left parietal lobes, left basal ganglia, brainstem, left temporal lobe
 - B. Penetrating gunshot wound of neck
 1. Lacerations of skin and subcutaneous soft tissues
 - C. Penetrating gunshot wounds (5) of chest
 1. Lacerations of skin, subcutaneous soft tissues, and skeletal muscles
 2. Fractures, left clavicle, left humerus, sternum
- II. Penetrating gunshot wounds (9) of torso with overlapping and indistinct wound tracts
 - A. Penetrating gunshot wounds (6) of chest
 1. Lacerations of skin, subcutaneous soft tissues, intercostal skeletal muscles
 2. Fractures, right rib 6 and left ribs 4, 6, & 7
 3. Lacerations, pericardium, heart, right coronary artery, left lung, diaphragm, liver, stomach
 - a. Right hemothorax, 600 ml
 - b. Left hemothorax, 200 ml
 - c. Hemopericardium, 50 ml
 - d. Retroperitoneal soft tissue hemorrhage
 - B. Penetrating gunshot wounds (3) of abdomen with lacerations of skin and subcutaneous soft tissues
 - C. Collective injuries:
 1. Lacerations of diaphragm, stomach, liver, gallbladder, small intestine, large intestine, right kidney, left kidney, skeletal muscles
 2. Fractures, left rib 11, lumbar spine L2 and L4 vertebral bodies
 3. Hemoperitoneum, 200 ml
- III. Perforating gunshot wounds (6) of left face, left shoulder, right chest, left leg, and right hand
 - A. Lacerations of skin, subcutaneous soft tissues, and skeletal muscles
 - B. Fractures, right index, middle, and ring finger phalanges
- IV. Blunt and sharp force injuries
 - A. Dicing injuries, face, torso, and left arm
 - B. Abrasions and cutaneous lacerations, torso
 - C. Abrasions, right and left legs

Cause of Death: Multiple (23) gunshot wounds of head and neck, torso, and extremities with skeletal, vascular, and visceral injuries.
HOMICIDE.

GROSS ANATOMIC DESCRIPTION

As viewed initially at the scene, the decedent was seated in the driver's seat of a car, having been involved in a police chase and shooting approximately 8-9 hours previously. The decedent's vehicle showed multiple (over 40) bullet holes in the windshield, and multiple additional bullet holes through all other windows, car doors, hood and trunk. The decedent was clothed in multiple layers of clothing with several gunshot wounds visible on the head, neck, and torso. No blunt force impact injuries or other significant trauma was evident. Body temperature was cold. Rigor mortis was strong. Livor mortis was unable to be assessed due to positioning of the body in the vehicle and presence of clothing.

EXTERNAL EXAMINATION: Received for autopsy examination is the body of a well-developed, obese black man who appears the stated age of 43 years. The body weighs 217.5 pounds and is 64 inches in length. Calculated body mass index is 37.

The body is cold to the touch. Rigor mortis is strong in the jaw, upper and lower extremities. There is fixed, purple, posterior livor mortis.

The scalp hair is black and up to ¼ inch in length. There is a black and gray facial goatee that is neatly trimmed. Inspection and palpation of the scalp reveal no masses, ulcers, or other lesions. The eyebrows and eyelashes are full with normal distribution. The irides are brown. The conjunctivae are unremarkable. The pupils are round and equal. The ears, nose, and lips are normal. The nares are patent and contain scant mucus and no blood. The nasal septum appears straight. Natural teeth are present and in a poor state of repair with several missing teeth.

The neck is short and supple. No cervical masses are palpable. The chest and breasts are symmetrical and of normal male configuration. The nipples are normal. No skin dimpling is present. The abdomen is symmetrical and unremarkable. No organomegaly or masses are palpable. The pubic hair has a normal distribution for gender. The external genitalia are those of a normal adult man. No lesions are evident. Both testes are in the scrotum and are normal to palpation.

The skin is dry. The upper and lower extremities are symmetrical. No edema is present. There is no muscle wasting, discoloration, clubbing, or other abnormalities in the hands or feet. Examination of the back shows no evident kyphoscoliosis. No decubital ulcers or other lesions are present. The anus and perineum are unremarkable. There is a folded fragment of toilet tissue paper between the buttocks.

IDENTIFYING MARKS AND SCARS:

The following scars are identified: ½" circular old scar on the left lower abdominal quadrant, ½" circular old scar on the left lateral lower leg, ½" linear old scar on the right lateral distal upper leg, and two 2" linear old scars on the top of the right foot.

EXTERNAL AND INTERNAL EVIDENCE OF RECENT THERAPY: None.

EXTERNAL AND INTERNAL EVIDENCE OF RECENT INJURY:

Wounds identified at autopsy are sequentially lettered from **A** through **HH**, generally moving from the top of the head toward the feet. Bullets and bullet fragments recovered are sequentially numbered from **#1** through **#21** as they are encountered at autopsy. Numbering and lettering does not imply the order in which the wounds were received. For purposes of localization, the shoulders measure 56 ¾" from the bottom of the feet.

1) Penetrating gunshot wound of left top of head

- A) **Entrance:** Top left scalp, "T"-shaped 1 ½" x ½" laceration with concentric abraded margin measuring less than 1/16" wide; ¾" left of midline top of head; no stippling or fouling identified (wound **A**)
- B) **Exit:** None
- C) **Injuries:**
 - i) Lacerations of left parasagittal parietal scalp and subcutaneous soft tissues with associated subgaleal hemorrhage
 - ii) Perforating laceration and fracture of left parietal skull with internal beveling

- iii) Lacerations of left parietal lobe, left basal ganglia, and left temporal lobe with associated subarachnoid hemorrhage, brain contusions and fragments of bone along wound tract
 - iv) Perforating laceration of left middle cranial fossa (temporal and sphenoid bones) with associated fractures of left and right frontal bones/roof of orbits
 - v) Lacerations of left temporomandibular joint skeletal muscles and associated soft tissues
 - vi) Penetrating laceration/fracture of left maxilla
 - D) Projectile recovery: Left maxilla and temporomandibular joint
 - i) Full metal jacketed bullet fragment, mushroomed open at the nose, recovered from left maxilla, measuring 5/16" diameter at the base, 1/2" diameter at the nose, and 3/8" length (bullet #16), etched on the base "TR16" at autopsy, recovered with a sliver of gray metal measuring 3/16" x 1/8" x 1/16" thickness. Both fragments submitted together to the Cuyahoga County Medical Examiner's Office Property Closet.
 - ii) Fragment of gray and copper-colored metal measuring 5/16" x 5/16" x 1/4" thickness recovered from left temporomandibular joint on further exploration (bullet fragment #21), submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - E) Trajectory: Downward, toward the left, back to front
- 2) Penetrating gunshot wound of right posterior head**
- A) Entrance: Posterior right scalp, 1" x 1/2" triangular-shaped irregular laceration with eccentric abraded margin measuring 1/16" wide posteriorly; 2" posterior of top of head and 2" right of midline; no stippling or fouling identified (wound B)
 - B) Exit: None
 - C) Injuries:
 - i) Lacerations of right parietal scalp and subcutaneous soft tissues with associated subgaleal hemorrhage
 - ii) Perforating laceration and fracture of right parietal skull with internal beveling
 - iii) Lacerations of right parietal lobe and right brainstem (pons, midbrain, and superior cerebral peduncle) with associated subarachnoid hemorrhage, brain contusions, and fragments of bone along wound tract
 - iv) Penetrating laceration/fracture of left petrous ridge (left temporal bone) with associated fractures of left and right frontal bones/roof of orbits
 - D) Projectile recovery: Left petrous ridge, full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 1/2" diameter at the nose, and 3/8" length (bullet #15), etched on the base "TR15" at autopsy, recovered with a sliver of gray and copper-colored metal measuring 1/4" x 1/8" x 1/16" thickness. Both fragments submitted together to the Cuyahoga County Medical Examiner's Office Property Closet.
 - E) Trajectory: Downward, right to left, back to front
- 3) Penetrating gunshot wound of left neck**
- A) Entrance: Left posterior-lateral neck, 3/8" x 3/16" slit-like laceration with white fuzzy material identified within the wound; 6 1/4" from top of head and 8" left of anterior midline; no abraded margin, stippling, or fouling identified (wound C)
 - B) Exit: None
 - C) Injuries: Lacerations of skin and subcutaneous soft tissues
 - D) Projectile recovery: Left posterior-lateral neck subcutaneous soft tissues, full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 9/16" diameter at the nose, and 3/8" length (bullet #6), etched on the base "TR" at autopsy, photographed with white fuzzy material, and both submitted together to the Cuyahoga County Medical Examiner's Office Property Closet
 - E) Trajectory: Left to right
- 4) Penetrating gunshot wound of midline upper chest**
- A) Entrance: Midline upper chest, suprasternal notch, 1 5/8" x 7/8" irregular laceration with eccentric abraded margin measuring 3/16" wide inferiorly and to the right; 54 1/2" from bottom of feet and in midline anterior torso; no stippling or fouling identified (wound F)
 - i) Associated 1" x 1/8" red abrasion, 1/8" from superior margin
 - ii) Associated 1 1/4" x 3/8" dry red abrasion under chin, 2" from superior margin
 - B) Exit: None

- C) Injuries: Lacerations of skin and subcutaneous soft tissues, fracture of superior aspect of left proximal clavicle
 - D) Projectile recovery: Left supraclavicular subcutaneous soft tissues, full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 1/2" diameter at the nose, and 3/8" in length (bullet #18), etched on the base "TR18" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - E) Trajectory: Upward, right to left, front to back
- 5) **Penetrating gunshot wound of left lateral upper chest/distal clavicle**
- A) Entrance: Left lateral upper chest/distal clavicle, 5/8" x 3/8" round laceration with concentric abraded margin measuring 1/4" wide inferiorly and 1/16" wide superiorly, laterally, and medially; 54" from bottom of feet and 5" left of midline; no stippling or fouling identified (wound G)
 - B) Exit: None
 - C) Injuries: Lacerations of skin and subcutaneous soft tissues, skeletal muscles, and fracture of left humerus
 - D) Projectile recovery: Left glenohumeral joint, full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 1/2" diameter at the nose, and 3/8" in length (bullet #17), etched on the base "TR17" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - E) Trajectory: Upward, right to left, front to back
- 6) **Penetrating gunshot wound of right mid-upper chest**
- A) Entrance: Right mid-upper chest, 3/4" x 1/2" triangular laceration with eccentric abraded margin measuring 3/8" wide superiorly and laterally; 49 1/4" from bottom of feet and 1/2" right of midline; no stippling or fouling identified (wound N)
 - B) Exit: None
 - C) Injuries: Lacerations of skin and soft tissues around sternum, fracture of distal sternum at level of rib 5
 - D) Projectile recovery: Posterior to sternum, 45 1/2" from bottom of feet and in midline, full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 1/2" diameter at the nose, and 3/8" in length (bullet #7), etched on the base "TR7" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - E) Trajectory: Downward, slightly right to left, front to back
- 7) **Penetrating gunshot wound of left anterior mid-upper chest**
- A) Entrance: Left mid-upper chest, involving medial aspect of left areola, 3/4" x 3/4" irregular laceration with eccentric abraded margin measuring <1/16" wide medially; 49" from bottom of feet and 4 1/2" left of midline; no stippling or fouling identified (wound O)
 - B) Exit: None
 - C) Injuries: Lacerations of skin and subcutaneous soft tissues
 - D) Projectile recovery: Full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 5/8" diameter at the nose, and 3/8" in length (bullet #3), recovered from shored wound (1/4" diameter purple contusion) subcutaneous soft tissues 1/4" anterior and inferior to wound Q, etched on the base "TR3" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - E) Trajectory: Downward, left to right, front to back
- 8) **Penetrating gunshot wound of left lateral mid-chest**
- A) Entrance: Left lateral mid-upper chest, 5/8" x 6/16" oval laceration with eccentric abraded margin measuring 1/4" wide anteriorly; 47 3/4" from bottom of feet and 8" left of midline; 1" below and 2 1/2" left of left nipple; no stippling or fouling identified (wound P)
 - B) Partial exit: Left posterior-lateral mid-chest, 3/4" x 3/16" oval laceration with torn edges and eccentric abraded margin measuring 1/16" wide superiorly; 47" from bottom of feet and 13 1/2" left of midline anterior torso (wound Q)
 - C) Injuries: Lacerations of skin and subcutaneous soft tissues
 - D) Projectile recovery: Full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 5/8" diameter at the nose, and 3/8" in length (bullet #2), etched on the base "TR2" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - E) Trajectory: Downward, left to right, front to back

9) Perforating gunshot wound of left face

- A) Entrance: Left cheek, $\frac{3}{4}$ " x $\frac{3}{4}$ " irregular stellate laceration with torn edges and concentric abraded margin measuring $\frac{1}{8}$ " wide anteriorly and $\frac{1}{16}$ " wide posteriorly, superiorly, and inferiorly with white fuzzy material identified within the wound; $5\frac{1}{2}$ " from top of head and 5" left of midline; no stippling or fouling identified (wound D)
- B) Exit: Left cheek buccal mucosa, $\frac{1}{4}$ " irregular laceration with torn edges
- C) Injuries: Laceration of left cheek skin, subcutaneous soft tissues, and buccal mucosa
- D) Projectile recovery: None
- E) Trajectory: Left to right, slightly back to front

10) Perforating/grazing gunshot wound of top of left shoulder

- A) Entrance & exit: Top of left shoulder, $\frac{1}{2}$ " x $\frac{1}{2}$ " grazing laceration with three $\frac{3}{4}$ " length parallel linear trails extending lateral-posteriorly; $56\frac{3}{4}$ " from bottom of feet and $7\frac{1}{2}$ " left of midline anterior torso; no stippling or fouling identified (wound E)
- B) Injuries: Superficial laceration of skin and subcutaneous soft tissues
- C) Projectile recovery: None
- D) Trajectory: Indeterminate

11) Perforating gunshot wound of right mid-upper chest

- A) Entrance: Right mid-upper chest, $\frac{1}{2}$ " x $\frac{3}{8}$ " oval laceration with concentric abraded margin measuring $<\frac{1}{16}$ " wide; $50\frac{3}{8}$ " from bottom of feet and $4\frac{1}{2}$ " right of midline; 1" medial and toward head from right nipple; no stippling or fouling identified (wound L)
- B) Exit: Right mid-upper chest, $\frac{1}{2}$ " x $\frac{3}{8}$ " oval laceration with eccentric abraded margin measuring $\frac{3}{16}$ " wide superiorly and $\frac{1}{8}$ " wide medially; $49\frac{1}{2}$ " from bottom of feet and $3\frac{1}{2}$ " right of midline; $2\frac{1}{2}$ " medial to right nipple (wound M)
- C) Injuries: Lacerations of skin and subcutaneous soft tissues
- D) Projectile recovery: None
- E) Trajectory: Downward, right to left

12) Perforating/grazing gunshot wound of left thigh

- A) Entrance & exit: Left thigh, $\frac{1}{4}$ " diameter laceration with concentric abraded margin measuring $\frac{1}{8}$ " wide; 24" from bottom of feet and in midline anterior thigh; no stippling or fouling identified (wound CC)
- B) Injuries: Lacerations of skin and subcutaneous soft tissues
- C) Projectile recovery: None
- D) Trajectory: Indeterminate

13) Perforating gunshot wound of right hand

- A) Entrance: Dorsal aspect of right hand, 1" x $\frac{5}{8}$ " irregular laceration with eccentric abraded margin measuring $\frac{1}{16}$ " wide laterally (toward radial head & thumb); no stippling or fouling identified (wound FF)
- B) Exit: Palm of right hand, 1" slit-like laceration with torn edges at medial aspect of thenar eminence (wound GG)
- C) Injuries: Lacerations of skin, subcutaneous soft tissues, and skeletal muscles
- D) Projectile recovery: None
- E) Trajectory: Dorsal/posterior to ventral/anterior

14) Perforating/grazing gunshot wound of right hand

- A) Entrance & exit: Multiple extensive deep grazing lacerations extending down right hand index, middle, and ring fingers (wound HH)
- B) Injuries: Lacerations of skin and subcutaneous soft tissues, skeletal muscles, fractures of underlying index finger, middle finger, and ring finger phalanges
- C) Projectile recovery: None
- D) Trajectory: Indeterminate

15) Penetrating gunshot wounds (9) of torso with overlapping and indistinct wound tracts

A) Penetrating gunshot wound of left upper chest

- i) Entrance: Left upper chest, $\frac{5}{8}$ " diameter round laceration with concentric abraded margin measuring $\frac{1}{16}$ " wide; $52\frac{1}{4}$ " from bottom of feet and $4\frac{7}{8}$ " left of midline; 2" above left nipple; no stippling or fouling identified (wound I)
- ii) Exit: None
- iii) Discrete injuries: Lacerations of skin and subcutaneous soft tissues, intercostal muscles between left anterior ribs 4 and 5
- iv) Trajectory: Downward into abdominal cavity, front to back

B) Penetrating gunshot wound of left upper chest/medial pectoralis

- i) Entrance: Left upper chest/medial pectoralis, 5/8" diameter round laceration with eccentric abraded margin measuring 1/16" wide inferiorly, superiorly, and laterally; 51 3/4" from bottom of feet and 2 3/4" left of midline; no stippling or fouling identified (wound J)
- ii) Exit: None
- iii) Discrete injuries: Lacerations of skin and subcutaneous soft tissues, intercostal muscles between left anterior ribs 4 and 5 with fracture of inferior aspect of rib 4, perforation of pericardium, deep graze at apex of heart into lumen of left ventricle, perforation of left lower lung lobe
 - (1) Extensive soft tissue/retroperitoneal hemorrhage around thoracic aorta
 - (2) Left hemothorax, 200 ml liquid blood
- iv) Trajectory: Downward into abdominal cavity, left to right, front to back

C) Penetrating gunshot wound of right upper chest/medial pectoralis

- i) Entrance: Right upper chest/medial pectoralis, 1/2" round laceration with concentric abraded margin measuring 1/8" wide; 51 3/8" from bottom of feet and 5/8" right of midline; no stippling or fouling identified (wound K)
- ii) Exit: None
- iii) Discrete injuries: Lacerations of skin and subcutaneous soft tissues, intercostal muscles between right ribs 3 & 4 at the costochondral junction, perforation of pericardium, perforation of right atrium and right coronary artery
 - (1) Right hemothorax, 600 ml liquid blood
 - (2) Hemopericardium, approximately 50 ml liquid and clotted blood
- iv) Trajectory: Downward into abdominal cavity, right to left, front to back

D) Penetrating gunshot wound of left lower medial chest

- i) Entrance: Left lower medial chest, 3/4" x 1/2" oval laceration with eccentric abraded margin measuring 1/8" wide superiorly and 1/16" wide medially; 49" from bottom of feet and 1 3/4" left of midline; no stippling or fouling identified (wound R)
- ii) Exit: None
- iii) Discrete injuries: Lacerations of skin and subcutaneous soft tissues
- iv) Trajectory: Downward into abdominal cavity inferior to left ribs, left to right, front to back

E) Penetrating complex gunshot wound of right lower chest

- i) Entrance: Right lower chest, 1/2" x 1/4" slit-like laceration with eccentric abraded margin measuring 1/4" wide superiorly; 49 1/2" from bottom of feet and 4 1/2" right of midline; 1" medial and 1" inferior to right nipple; no stippling or fouling identified (wound S)
- ii) Exit: Right lower chest, 1/2" x 1/8" slit-like laceration with eccentric abraded margin measuring 1/4" wide inferiorly; 48 3/4" from bottom of feet and 4 1/2" right of midline; 1 1/4" medial and 2" inferior to right nipple (wound T)
- iii) Re-entry: Right lower chest, 1/2" x 1/4" slit-like laceration with eccentric abraded margin measuring 3/8" wide inferiorly; 48 1/4" from bottom of feet and 4 1/4" right of midline; 1 1/2" medial and 2 1/2" inferior to right nipple (wound U)
- iv) Discrete injuries:
 - (1) 3/4" x 1/8" dry red abrasion, 1/8" from inferior margin of wound S
 - (2) 5/8" x 1/4" dry red abrasion, 3/4" from inferior margin of wound U
 - (3) Lacerations of skin and subcutaneous soft tissues, intercostal muscles between right ribs 6 and 7 with fracture of inferior aspect of rib 6, perforation of right diaphragm and liver
- v) Trajectory: Downward into abdominal cavity, right to left, front to back

F) Penetrating gunshot wound of left lower chest

- i) Entrance: Left lower chest, 5/8" x 1/2" oval laceration with concentric abraded margin measuring 1/4" wide medially, 1/8" wide inferiorly, and 1/16" wide superiorly and laterally; 47" from bottom of feet and 2 1/4" left of midline; no stippling or fouling identified (wound V)
- ii) Exit: None
- iii) Discrete injuries: Lacerations of skin and subcutaneous soft tissues, through costochondral cartilage of left ribs 6 & 7, perforation of stomach
- iv) Trajectory: Downward into abdominal cavity, front to back

G) Penetrating gunshot wound of right upper abdomen

- i) Entrance: Right upper abdomen, 3/4" x 5/8" oval laceration with concentric abraded margin measuring 1/4" wide inferiorly and laterally and 1/16" wide superiorly and medially; 46 1/2" from bottom of feet and 2" right of midline; no stippling or fouling identified (wound W)
- ii) Exit: None
- iii) Discrete injuries: Lacerations of skin and subcutaneous soft tissues

- iv) Trajectory: Downward, front to back
- H) Penetrating gunshot wound of right upper abdomen**
 - i) Entrance: Right upper abdomen, $\frac{3}{4}$ " x $\frac{1}{2}$ " oval laceration with concentric abraded margin measuring $\frac{1}{8}$ " wide; 44 $\frac{3}{4}$ " from bottom of feet and 1 $\frac{3}{4}$ " right of midline; no stippling or fouling identified (wound X)
 - ii) Exit: None
 - iii) Discrete injuries: Lacerations of skin and subcutaneous soft tissues
 - iv) Trajectory: Downward, front to back
- I) Penetrating gunshot wound of midline upper abdomen**
 - i) Entrance: Midline upper abdomen, $\frac{3}{4}$ " x $\frac{5}{8}$ " oval laceration with eccentric abraded margin measuring $\frac{1}{8}$ " wide superiorly and $\frac{1}{16}$ " wide inferiorly and to the right; 44 $\frac{3}{4}$ " from bottom of feet and in midline anterior abdomen; no stippling or fouling identified (wound Y)
 - ii) Exit: None
 - iii) Discrete injuries: Lacerations of skin and subcutaneous soft tissues
 - iv) Trajectory: Downward, front to back
- J) Collective injuries**
 - i) Perforating lacerations (at least 7) of diaphragm
 - ii) Perforating lacerations (4) of gastric wall perforations
 - iii) Liver injuries:
 - (1) One perforating laceration of liver parenchyma with entrance and exit wounds separated by 2" on posterior surface
 - (2) One perforating laceration through gall bladder with $\frac{1}{2}$ " grazing laceration of posterior liver and associated hemorrhage within posterior liver capsule
 - (3) One 2 $\frac{1}{2}$ " grazing laceration of posterior liver
 - iv) Perforating lacerations (7) of small intestine: duodenum (3), jejunum (1), ileum (3)
 - v) Multiple lacerations of ascending and transverse colon segments
 - vi) Perforating laceration of right kidney and grazing laceration of anterior surface of left kidney
 - vii) Perforating laceration of left iliopsoas muscle with surrounding 2" diameter intramuscular contusion
 - viii) Fractures, left rib 11, L2 vertebral body, L4 vertebral body
 - ix) Lacerations of paraspinal skeletal muscles and subcutaneous soft tissues
 - x) Hemoperitoneum, 200 ml
- K) Projectile recovery**
 - i) Right upper abdomen, ascending colon wall, full metal jacketed bullet fragment, mushroomed open at the nose, measuring $\frac{5}{16}$ " diameter at the base, $\frac{9}{16}$ " diameter at the nose, and $\frac{3}{8}$ " in length (bullet #8), etched on the base "TR8" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - ii) Posterior left lateral back muscles, associated with left rib 11 fracture, full metal jacketed bullet fragment, mushroomed open at the nose, measuring $\frac{5}{16}$ " diameter at the base, $\frac{1}{2}$ " diameter at the nose, and $\frac{3}{8}$ " in length (bullet #9), etched on the base "TR9" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - (1) Found with bullet #10, same location
 - iii) Posterior left lateral back muscles, associated with rib 11 fracture, full metal jacketed bullet fragment, mushroomed open at the nose, measuring $\frac{5}{16}$ " diameter at the base, $\frac{1}{2}$ " diameter at the nose, and $\frac{3}{8}$ " in length (bullet #10), etched on the base "TR10" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - (1) Found with bullet #9, same location
 - iv) Right lateral L2 vertebral body, full metal jacketed bullet fragment, mushroomed open at the nose, measuring $\frac{5}{16}$ " diameter at the base, $\frac{1}{2}$ " diameter at the nose, and $\frac{3}{8}$ " in length (bullet #11), etched on the base "TR11" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - v) Anterior midline L4 vertebral body, full metal jacketed bullet fragment, mushroomed open at the nose, measuring $\frac{5}{16}$ " diameter at the base, $\frac{1}{2}$ " diameter at the nose, and $\frac{3}{8}$ " in length (bullet #12), etched on the base "TR12" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
 - vi) Left lower back subcutaneous soft tissues, posterior to perforated left iliopsoas muscle, full metal jacketed bullet fragment, mushroomed open at the nose, measuring $\frac{5}{16}$ " diameter at the base, $\frac{1}{2}$ " diameter at the nose, and $\frac{3}{8}$ " in length (bullet #13), etched on the base "TR13" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet

- vii) Posterior right lobe of liver, adjacent to gall bladder bed, full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 7/16" diameter at the nose, and 5/16" in length (bullet **#14**), etched on the base "TR14" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
- viii) Posterior left ribcage at level of rib 6, full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 9/16" diameter at the nose, and 3/8" in length (bullet **#19**), etched on the base "TR19" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet
- ix) Posterior left ribcage, paraspinal musculature inferior to rib head 9, full metal jacketed bullet fragment, mushroomed open at the nose, measuring 5/16" diameter at the base, 1/2" diameter at the nose, and 3/8" in length (bullet **#20**), etched on the base "TR20" at autopsy and submitted to the Cuyahoga County Medical Examiner's Office Property Closet

16) Blunt and sharp force injuries

- A) Dicing injuries, scattered over face, torso, and left arm including:
 - i) 1/4" dry brown abrasion, right forehead
 - ii) Right upper chest/proximal clavicle, 5/16" x 1/8" slit-like laceration, 53 7/8" from bottom of feet and 2" right of midline (wound **H**)
 - iii) Left lower abdomen, 3/8" x 1/8" oval laceration with 1/16" abraded margin, 39 3/4" from bottom of feet and 5 1/2" left of midline (wound **BB**)
- B) Abrasions and cutaneous lacerations of torso
 - i) 1 1/2" x 1/4" triangular dry brown abrasion of left lower chest/upper abdomen, 1" superior-medial to wound **V**
 - ii) 1/4" x 1/8" triangular cutaneous laceration of right lateral upper abdomen; 45 1/2" from bottom of feet and 6 1/2" right of midline (wound **EE**)
 - (1) Sliver of gray and copper-colored metal measuring 5/16" x 1/4" x less than 1/16" thickness (bullet fragment **#1**) recovered from skin surface
 - iii) 1/16" round cutaneous laceration of right mid-abdomen; 41 1/2" from bottom of feet and 1 1/2" right of midline; 2 1/4" superior to umbilicus (wound **AA**)
 - (1) Sliver of gray and copper-colored metal measuring 1/8" x 1/16" x less than 1/16" thickness (bullet fragment **#5**) recovered from skin surface
 - iv) 1/2" x 1/4" slit-like cutaneous laceration with 1/16" concentric abraded margin, left mid-abdomen, 41 3/4" from bottom of feet and 1 1/4" left of midline; 2 1/4" superior to umbilicus (wound **Z**)
 - (1) Sliver of gray and copper-colored metal measuring 3/16" x 1/8" x less than 1/16" thickness (bullet fragment **#4**) recovered from skin surface
- C) Abrasions of extremities
 - i) 1 1/2" x 1/2" cluster of dry, red abrasions, right thigh, 25-26" from bottom of feet
 - ii) 1" x 1/2" red abrasion, left lateral lower leg

The injuries above, once stated, will not be repeated below.

INTERNAL EXAMINATION:

The body is opened with the usual Y-shaped incision. The thoracic and abdominal organs are in their normal anatomic positions. There is approximately 600 ml of liquid blood in the right chest cavity and approximately 200 ml of liquid blood in the left chest cavity. There is approximately 200 ml of blood and intestinal contents in the abdominal cavity. The serous surfaces are smooth and glistening. No adhesions are present. The stomach and bowel are not distended. The omentum is normal. No abnormal masses are identified.

Weights of the internal organs are as follows, and, unless specified below, show no evidence of congenital or acquired disease.

Brain:	990 grams
Heart:	370 grams
Right lung:	310 grams
Left lung:	310 grams
Liver:	1,050 grams
Spleen:	120 grams
Right kidney:	120 grams
Left kidney:	140 grams

NECK: The organs of the neck are removed and examined en bloc. The larynx and trachea have a normal caliber and are free of obstruction. The thyroid gland is pale,

normal in size, bilobed and symmetrical. No nodules, cysts, or other lesions are present. No enlarged parathyroid glands are found. The cervical lymph nodes are not enlarged. The paravertebral musculature is unremarkable. No hemorrhage is present in the neck. The cervical spine, hyoid bone, and tracheal cartilage are intact.

CARDIOVASCULAR SYSTEM: The pericardial surfaces are smooth and glistening. The heart is not enlarged. The configuration of the heart is normal.

The coronary ostia are patent. The right coronary artery supplies the posterior descending coronary artery. There is no significant coronary atherosclerosis. No thrombus or other total coronary occlusion is evident.

The heart chambers are of normal size. The endocardial surfaces are smooth and glistening. The valve circumferences are as follows: tricuspid 11.5 cm, pulmonary 6.0 cm, mitral 10.5 cm, and aortic 5.4 cm. The leaflets and cusps are delicate, with no evidence of fusion or other scarring. The chordae tendineae are normal. The myocardium generally is red/brown and of normal consistency. The myocardium does not show focal areas of softening, discoloration, or fibrosis. The thickness of the cardiac walls is as follows: right ventricle 0.5 cm, left ventricular free wall 1.4 cm, and interventricular septum 1.4 cm. The foramen ovale is closed. There is no interventricular septal defect.

The aorta has a normal caliber throughout. It shows no significant atherosclerotic plaques of the intimal surface. No major ostia are obstructed. No mural thrombi or aneurysms are found. The aortic branches are unremarkable. The vena cavae contain only postmortem clot.

RESPIRATORY TRACT: The lobation of the lungs is normal. Pleural surfaces are smooth and shiny. The tracheobronchial tree contains scant mucus. The mucosa is smooth and tan. No focal lesions or obstructions are found. The pulmonary parenchyma is air-filled anteriorly, and red and wet posteriorly. No focal infiltrates or masses are present. The lungs are speckled by black pigment deposits. The blood vessels contain only postmortem clot. The main pulmonary arteries do not show plaque. The hilar and subcarinal nodes are black and gray. They are not enlarged, and show no focal lesions.

RETICULOENDOTHELIAL SYSTEM: The spleen has a smooth and intact capsule without areas of thickening. The parenchyma is dark red with gray/white spots of white pulp. No focal lesions are identified. No accessory spleen is found. No abnormal lymph nodes are identified. The thymus gland is not grossly apparent.

HEPATOBIILIARY SYSTEM: The liver capsule is smooth and glistening. The liver configuration is normal. The liver parenchyma is dark red/brown and is of normal consistency with a normal lobular architecture. The intrahepatic ducts and vessels are unremarkable.

The gallbladder is present. It is normal in size, and the serosa is smooth and glistening. The gallbladder contains no bile and no stones. The wall is thin and the mucosa is smooth with no focal lesions.

DIGESTIVE SYSTEM: The esophagus is not dilated or constricted. The mucosa is gray, wrinkled, and unremarkable. No varices, ulcers, or other lesions are evident. The gastroesophageal junction is distinct. The stomach is of normal size, and the wall is not thickened. The stomach contains no gastric contents. The gastric mucosa has normal rugal folds and no ulcers. The small intestine is unremarkable. The vermiform appendix is present and unremarkable. The colon and rectum are normal. The mesentery is normal and contains only small lymph nodes. No thrombi are seen in the mesenteric vessels. The pancreas is normal in size and shape. The tan firm lobular parenchyma shows no fat infiltration, hemorrhage, fat necrosis, masses, or other lesions. The main ducts appear normal.

ADRENAL GLANDS: The adrenal glands are normal in size, and show normal cortical and medullary structure. No focal adrenal lesions are found.

GENITOURINARY SYSTEM:

Kidneys: The renal capsules strip with ease, and the subcapsular surfaces are smooth. The cortices are of normal thickness. On cut section the corticomedullary demarcation is clear. The medullary areas are normal. The papillae are not blunted. The calyces and pelves are not dilated. Their lining mucosa is tan and smooth. The ureters are not dilated.

Urinary bladder: The urinary bladder is normal and contains approximately 45 ml of cloudy yellow fluid. No stones are present. The lining mucosa is gray, smooth, and unremarkable. The bladder wall is of normal thickness.

Prostate: The prostate parenchyma is gray/white, firm, and rubbery. No nodular areas or other lesions are identified.

Testes: The testes are present within the scrotal sac, bilaterally. No hydroceles or varicoceles are evident. Sectioning is unremarkable.

MUSCULOSKELETAL SYSTEM: Examination of the walls of the thorax, abdomen, and pelvis shows no pathologic changes other than as describe above in the evidence of injury section. The diaphragm and psoas muscles appear normal. The spinal column does not show kyphosis or scoliosis. A section of the vertebral column shows plump intervertebral discs. The trabecular bony tissue and the marrow are firm. There are no focal lesions.

CENTRAL NERVOUS SYSTEM: The head is examined in the usual manner. No scalp, galeal, epidural, subdural, or subarachnoid lesions are identified other than as described above in the evidence of injury section. The venous sinuses appear to contain only postmortem clot. The cerebrospinal fluid is bloody. The general configuration of the brain is unremarkable. The vessels at the base of the brain are complete and symmetric. No atheromatous changes or aneurysms are seen. The cerebral hemispheres show the normal pattern of convolutions. No significant edema is appreciated. No focal lesions are seen.

Sequential coronal sections of the cerebrum show a well-defined gray/white matter junction and no abnormalities other than as described above in the evidence of injury section. The centrum semiovale, corpus callosum, and corpus striatum are unremarkable. Hippocampi are symmetric and of normal size and configuration. The ventricular system is symmetric and not dilated.

Sequential transverse sections of the brainstem perpendicular to its long axis display no abnormalities other than as described above in the evidence of injury section. The substantia nigra and locus ceruleus are normally pigmented. The basis pontis is unremarkable. The medulla displays normal inferior olives and symmetrical pyramids.

Sagittal sections of the cerebellar vermis and parasagittal sections of the cerebellar hemispheres display normal folia and white matter. The dentate nucleus is unremarkable.

The pituitary gland is grossly normal. The skull shows no fractures or other lesions other than as described above in the evidence of injury section. The sinuses and middle ears are not dissected. The spinal cord is examined and is grossly unremarkable.

Dr. Joseph Felo and East Cleveland police officers Scott Gardner and Kevin Harvey were present during the autopsy.

MICROSCOPIC DESCRIPTION

Heart:	No significant histopathologic abnormalities
Lungs:	Patchy atelectasis Pigmented alveolar macrophages Scattered fragments of polarizable refractile foreign material Airspace edema and hemorrhage Anthracosis Autolysis
Liver:	Autolysis No significant histopathologic abnormalities
Kidney:	Autolysis No significant histopathologic abnormalities

Case: IN2012-02023
Name: Timothy Ray Russell

County: Cuyahoga

Brain: Vascular congestion
Multifocal petechial hemorrhages, temporal lobe, basal
ganglia, pons
Subarachnoid hemorrhage

Andrea L. Wiens, D.O.

Date

CUYAHOGA COUNTY MEDICAL EXAMINER

Cause Of Death Report - Internal Use Only

Case Number: IN2012-02023 Name: Timothy Russell

Post Type: POST

Death: 11/29/2012

On or About Death Date:

Pathologist: Wiens D.O., Andrea L.

Gen Typist: Nugent, Elizabeth

Cause Of Death:

Multiple gunshot wounds (23) of head and neck, torso, and extremities with skeletal, soft tissue, vascular, and visceral injuries.

HOMICIDE.

>>> Elizabeth Nugent 12/4/2012 4:34 PM >>>
Dr. Wiens,

The COD is too long; it cuts out at '*visceral*'

'Multiple (23) gunshot wounds of head and neck, torso, and extremities with skeletal, soft tissue, vascular, and visceral' ... [on every computer program].

Please advise.

Thank you,
Elizabeth

RELEASE

This form must be completed and submitted to the Medical Examiner, prior to the release of any deceased person in the custody and control of the Cuyahoga County Medical Examiner's Office.

THE UNDERSIGNED HEREBY AUTHORIZES THE CUYAHOGA COUNTY MEDICAL EXAMINER'S OFFICE TO RELEASE THE REMAINS

OF: Timothy Russell WHO EXPIRED ON: November 29, 2012
NAME OF DECEDENT (PRINT OR TYPE) DATE OF DEATH

TO: Johnson-Romito Funeral Home 521 Broadway Ave., Bedford, OH 44146
NAME & ADDRESS OF FUNERAL HOME OR OTHER AGENCY REGULATED OR AUTHORIZED BY OHIO LAW

The undersigned, hereby after REPRESENTATIVE, requests that the Cuyahoga County Medical Examiner's Office release the above referenced deceased to the above referenced agency whose business is to arrange for the burial or cremation of the deceased. The undersigned represents that he/she is the next-of-kin of the deceased or other person authorized by law to receive the remains and has full authority to give permission for the release of the body. The REPRESENTATIVE acknowledges that he/she has read and understands the below "Statement of Policy" regarding the autopsy process; the notification procedures required to request the return of organs/tissues/fluids removed and retained during the autopsy process, and the time limits associated therewith.

STATEMENT OF POLICY

We, at the Cuyahoga County Medical Examiner's Office understand that you and your family have sustained a significant loss and we offer our condolences. Though we understand that this is a time of great sorrow for the family, Ohio law mandates that the Medical Examiner become involved and inquire into the circumstances surrounding the above referenced death. Ohio law further requires the Medical Examiner to establish the true cause and manner of death. Notwithstanding, the Medical Examiner is bound by law to inform you that as a part of a forensic examination, **if an autopsy is performed**, certain organs, fluids and tissues may be retained by the Medical Examiner's Office in order to perform a complete and thorough examination. Depending upon various factors, these items may be held for at least three (3) years. Upon expiration of the retention period concerning this material, the REPRESENTATIVE has the right to claim and make separate arrangements for the proper disposal of these remains. If the REPRESENTATIVE or other authorized person chooses not to make their intentions known to the Medical Examiner's Office in writing, within thirty (30) days of this notice, the County of Cuyahoga will respectfully assume and take care of this matter for the REPRESENTATIVE in a dignified and respectful fashion. Again, we offer our condolences to you and your family. If anyone has any questions, please contact us at 216-721-5610.

Re: Records Request Regarding Timothy Ray Russell, D.O.D.
November 29, 2012.

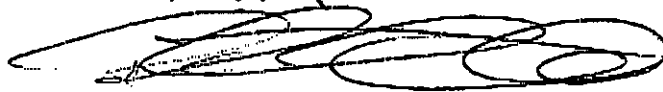

Dear Medical Examiner:

I am lead counsel representing the Russell family. Enclosed please find a copy of a signed authorization for your office to release certain records pursuant to Ohio Revised Code §1313.10 *et seq.* Mr. Dave Russell is the decedent's father and next of kin.

Please contact me directly so as to schedule a time for Mr. Russell or me to pick up the records. Or, you may mail these records directly to my office.

Thank you for your cooperation.

Very truly yours,

Paul J. Cristallo

Re: Records Request Regarding Timothy Ray Russell, D.O.D.
November 29, 2012.

Dear Medical Examiner:

Pursuant to Ohio Revised Code §1313.10 et seq., please provide me a complete copy of the entire Cuyahoga County Medical Examiner's file relative to my son, Mr. Timothy Ray Russell. I am his father and next-of-kin. As such, I am entitled to all of his coroner records, including photographs, toxicology reports, and autopsy test results. It is my understanding that gunshot residue (GSR) tests were performed on my son. I am requesting the GSR test results, along with any other forensic tests results.

Please let me know as soon as possible when I may come to your office to pick up the requested information.

Thank you for your cooperation.

Very truly yours,

Dave Russell, Father of the Deceased

Dear Dr. Gilson,

The Ohio Office of Criminal Justice Services (OCJS) is responsible for collecting data on behalf of the Department of Justice with regard to the federal Deaths in Custody Reporting Act (DICRA) of 2000 (Public Law 106-297). This Act requires data collection on inmate deaths in local jails, state prisons, and juvenile correctional facilities. In 2003, the program was expanded to include deaths that occur in the process of arrest, in the custody of law enforcement officers, or as the result of lethal force by officers.

OCJS requests that your office provide us with information we need to fulfill this federal request. Specifically, we are asking you to provide the autopsy and case summary report of the following individual:

Timothy Russell, date of death 11/29/2012 —
Malissa Williams, date of death 11/29/2012

Please do not hesitate to contact me if you have questions. If you would like more information on DICRA, you can go to our website: <http://www.ocjs.ohio.gov/deathincustody.stm>. Thank you for your time.

Sincerely,

Lisa Contos Shoaf, Ph.D.
